

Log Cranes

Fulghum log handling cranes, now with five sizes to choose from, have become the new standard of American woodyards. Stronger than ever, these versatile machines have proven themselves with hundreds of thousands of hours of unloading, storing and feeding tree length logs for lumber and chip mills alike.

Operators find that our crane mounted cab offers new ease in all log handling functions. Owners find that Fulghum's low-maintenance features are also a great asset.

Fulghum log cranes are of a robust and dependable design. These same qualities are built in our expanded and modernized machine and assembly plant under rigid quality controls. Such important components as the grapple are made in this plant. At this complex we also inventory thousands of parts to quickly replace any worn components in the field.
