

# Rosserhead Debarkers

Fulghum's Rosserhead debarkers set the industry standard for profitable service. With three Fulghum models of varying lengths to choose from as well as an optional all-weather control cab, mill owners are assured year-round trouble free operation with higher productivity than ever.

Split bullwheels allow for simple and fast replacement.

A Fulghum Rosserhead packs more debarking punch through its extra heavy steel fabrication and stronger motors. The head traverse, bullwheel rotation and kicker system are hydraulically powered by a 15 or 20 hp power pack. A powerful air cylinder raises and lowers the debarking head, precisely floating it over logs for near perfect debarking performance.

Fulghum provides a variety of debarking heads and will recommend the best unit for your wood source. Fulghum field representatives can aid in assembling, complete checkout and startup of your Rosserhead installation.

MODEL	600	800	1000
Debarker Head Motor	25hp	30 hp	40 hp
Hydraulic Power:			
Unit Motor	15 hp	20 hp	20 hp
Debarker Head	H-7	H-7	H-7
