

Rotary Screens

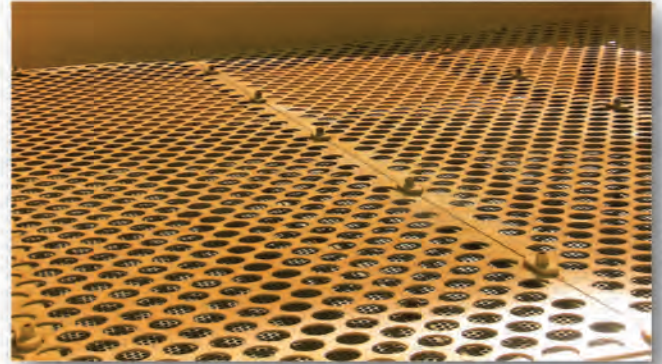

Fulghum's rotary screens separate out over size chips and fines producing near perfect chip grading; chips uniform in size, free of sawdust and splinters.

www.fulghum.com

Sturdy reliability and trouble free operation make the Fulghum rotary chip screen the most useful self-contained equipment of its kind. Large output and small power requirements are other characteristics making this machine popular throughout the forest products industry regardless of the screening application.

The versatile Fulghum rotary screen is designed to meet your exact specifications. Screen openings are tailored to your requirements and ease of installation means you can locate this equipment almost anywhere on your site.
